

I am requesting that LPFM stations are not given priority over FM translators. This service may discontinue K-LOVE station 94.3 in the Chicagoland area, which has an extraordinary impact on the local community and me as a resident of Palatine, IL. One service they offer is a daily radio bulletin, where local non-profit organizations and churches can post upcoming events like concerts, conferences, and theater productions that draw families, people of all ages, and communities together in the area. This radio station also offers positive, family-friendly programming that is unmatched in the Chicagoland area and continually uplifts the listeners with music, news, and helpful commentary for living. Losing K-Love 94.3 to a LPFM station would be a great detriment to the area, and would be sorely missed by hundreds of thousands of listeners.
